In the claims:

1. (original) A method of coordinating an activity at a destination of a first party and a second party comprising the steps of:

receiving a first signal indicative of a location of the first party, wherein the first signal is received at a central scheduling computer;

receiving a second signal indicative of a location of the second party, wherein the second signal is received at the central scheduling computer; and

creating a schedule to coordinate an activity automatically at the destination based at least in part on the first and second signals.

- 2. (original) The method of claim 1 further comprising the steps of: receiving at the central scheduling computer an update of the location of the first party; and updating the schedule automatically based on the update of the location of the first
- 3. (original) The method of claim 1 further comprising the step of estimating a time of arrival for at least one of the first party and the second party at the destination to provide estimates.
- 4. (original) The method of claim 3 further comprising the step of updating at least one of the estimated time of arrival of the first party and the estimated time of arrival of the second party.
- 5. (original) The method of claim 1, wherein at least one of the first and second signals are one of a preprogrammed audio message, a preprogrammed video message and a preprogrammed text message.
- 6. (original) The method of claim 1, wherein at least one of the first signal and the second signal is transmitted in response to a manual action by at least one of the first party and the second party respectively.

- 7. (original) A method of notification upon arrival at a predetermined location comprising the steps of:
 - receiving a first signal indicative of a first location of a first party;
 - transmitting a second signal to a second party when the first location is equal to a first predetermined location; and
 - coordinating an activity at a second predetermined location based on the second signal.
- 8. (original) The method of claim 7, further comprising the step of locating the first party to provide the first location.
- 9. (original) The method of claim 7, wherein the step of transmitting the second signal is triggered automatically.
- 10. (original) The method of claim 7, wherein the step of transmitting the second signal is triggered manually by the first party.
- 11. (original) The method of claim 7, wherein the second signal is one of a preprogrammed audio message, a preprogrammed video message and a preprogrammed text message.
- 12. (original) The method of claim 7, wherein the second signal is programmed by the first party.
- 13. (original) The method of claim 7, wherein the first predetermined location is one of an address, an intersection, a threshold distance and a defined area.
- 14. (original) The method of claim 7, wherein the second signal is specific only to the first party.
- 15-25. (canceled)
